VERSION CONTROL

LECTURE 08

LEARNING OBJECTIVES

- I can explain at least two motivations for using version control
- I understand what a repository is and its relationship to Git and GitHub
- I can apply the basics of version control to GitHub to:
    o Create a repository
    o Add files
    o Edit/Save files
    o Create branches
    o Make a pull request
    o Resolve conflicts
    o Merge branches
- I can make a fork of a repository
- I can apply the basics of version control to Git to:
    o Clone a repository
    o Stage files
    o Commit
    o Push
